

Ziggy Table & Ziggy Stool

Designed by Brad Ascalon for Hightower

Hightower™

Ziggy Table & Ziggy Stool

The modern workspace is built around versatility and adaptability. Pieces need to fit in with a user's changing needs throughout the day and the Ziggy Table and Stool were designed to do exactly that. Whether utilized for solo work or combined in groups for collaboration, these pieces fit with the needs of the ever-changing office and public environments.

Available July 2020

Ziggy Table

Free to Roam

Geometrically striking and playfully unique, the Ziggy Table is a fun and functional addition to any multi-use space. Its lightweight and compact nature allows the table to easily be moved to create a safe and comfortable workspace anywhere.

Utilize the Ziggy as a laptop or side table with existing lounge pieces, or pull up a pouf to create a small-footprint work station wherever needed.

Stack It Up

The Ziggy Table was intentionally designed with a 60° angle, allowing for 6 tables to come together to create a larger group breakout area. Once the meeting is done, stack up to 4 tables and tuck them away to save precious space.

Made for Mobility; Designed for Comfort

With a crafted leather handle and base, the Ziggy Stool is ready to slide wherever you need it.

Pull one up to any meeting table for a collaborative work zone or bring over a Ziggy Table to create a space for focused individual work. The foam top and unique shape will ensure a comfortable seat, no matter the duration.

Get Into Shape

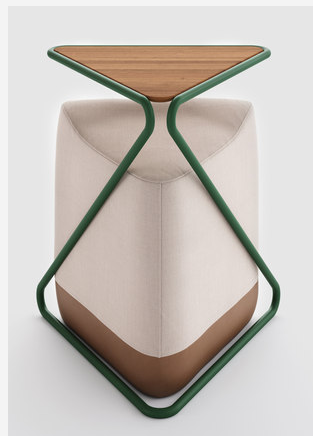

The triangular shape and contoured foam top of the Ziggy Stool create a comfortable and directional seat while also distinguishing it from other poufs on the market.

With a refined and simple design, this stool will easily fit into any space, whether for work, play, or education.

Better Together

While they're great pieces individually, the Ziggy Table and Stool really shine when brought together. The shape of the stool was designed to nest directly under the table, saving space when not in use, but providing a personal workstation when needed. Create a winning combination for productivity with these two pieces.

Create Your Color Story

With 9 tabletop finishes and 10 frame color options, the Ziggy Table can easily align with your space's design aesthetic and pairs back to many other items within the Hightower product collection.

Specify a complementary fabric on the Ziggy Stool to create a dynamic duo. The leather handle and base are available in Black or Brown.
