ADELL

Design by Lievore + Altherr Désile Park, 2020

Smooth like a pebble, soft as mounded moss. With low rounded curves, Adell evokes a precious keepsake from the natural world—whether in use indoors or out. With a shell made from 80% recycled polypropylene, the calming form has been designed with sustainability at its foundation, putting both body and mind at ease. Plush yet supportive, substantial yet lightweight, Adell's gentle slopes offer a welcoming and generous place of rest.

Adell has been created with adaptability in mind. Designed for use in spaces of repose, Adell can be customized to suit myriad contexts, from lounge areas to waiting rooms, educational common areas, hospitality spaces or residential settings. To accommodate a variety of contexts, Adell is available in a recycled textured plastic finish only, fully upholstered, in plastic with upholstered seat cushion, or in plastic with a removable cushion or full cover, for indoor and outdoor use. Base options include metal or wooden leg configurations or sled base in metal. These configuration options and timeless design extend the use cases of the Adell, creating an enduring product with a long lifespan to reduce the amount of waste in our environment.
