

The Kisty Seating Collection by Encore is Nothing Short of Delightful

Colorful, spirited and full of fun, the Kisty collection by Encore delivers a refreshing take on multipurpose seating with stackable, swivel and mobile options in a spectrum of material and finish selections.

Designed by Just Meijer of Indecom Furniture Design, a firm based in the Netherlands and recognized for their focus on sustainability, the series features traditional elements you'd expect to see in Scandinavian design such as a minimalist aesthetic and an airy, light-scale feel, while incorporating modern touches like a uniquely formed shell specifically created with comfort in mind.

In keeping with the design firm's and Encore's own commitment to earth-friendly manufacturing processes, polypropylene shells are comprised of 30% recycled materials and come in seven shades ranging from neutrals to brights. Selections include on-trend colors such as mint green, muted blue and warm gray, each of which can be matched to metal base finishes for a monotone appearance or combined with alternate finish colors to achieve a variety of playful combinations. A fully upholstered option is also available to further expand its visual possibilities and ensure a perfect fit for any space.

Base styles include 4-leg metal - available with and without arms, metal A-frame and wood legs in addition to swivel models on glides or on casters. All are engineered to provide flexibility and space-saving benefits via their small footprint and lightweight construction, with A-frame and 4-leg metal versions offering the additional convenience of stacking capabilities for quick and easy storage.

"The Kisty collection was first and foremost conceived to provide design flexibility, offering the opportunity to create endless combinations with a range of poly colors, upholstery options, base designs and finishes," states Helen Kim, Encore Vice President of Marketing. "Maintaining a high level of recycled material was also key, as were space-saving capabilities which have become fundamental in most forward-thinking design plans."

With its inherent versatility, light and nimble design and sustainable componentry, Kitsy hits all the marks and proves to be an abundantly functional series that's nothing short of delightful.

About Encore:

Located in Southern California, Encore provides innovative seating and table products for today's ever-changing environments, from corporate offices and educational institutions, to hospitality spaces, healthcare facilities and beyond.

What began as a small task and guest seating company in 1999, quickly evolved to encompass a broader range of products from lounge and modular seating to tables, benches and more. Our flexible nature and easy-to-do-business-with mentality, combined with expert craftsmanship, attention to detail and an enduring commitment to new product development, are the guiding principles that we live by and we strive to exceed expectations at every turn.

As part of the Arcadia family-owned and operated business, the Encore brand signifies modern styling with light-scale, on-trend designs. We share in the commitment to uphold intelligent environmental policies and practices, ensuring all our products are held to the highest standards, in-step with California's progressive sustainability objectives. And together, our mission is to provide value beyond furniture, through customized solutions, responsiveness to customer needs and demonstrating high levels of care to reflect our appreciation for those we serve.

We invite you to connect with us locally, in our Chicago showroom, or by contacting us online to learn more and explore the possibilities.
