### **ALLSTEEL PRESENTS NEW Pli TASK CHAIR FEATURING INNOVATIVE, AUTO-FITTING DESIGN**

**(MUSCATINE, IA)**--With the understanding that today's team members expect and deserve comfort from their office furnishings, Allsteel, Inc. is excited to introduce Pli, a responsive task chair that makes motion easy. A light-task or alternative-task solution, Pli supports contemporary workplace mobility behaviors while offering an approachable, appealing design aesthetic that is easy to integrate into any visual identity. Need to include Deisig Design here.

Pli provides automatic comfort through two innovative design features. The first is a four-point seat suspension system that dynamically responds to the user's natural shifts in seated postures to support healthy workstyles. The second is a backrest that has been purposely engineered to reduce the perception of a rigid perimeter, such as that found on most traditional mesh-back designs. Offered in task and stool-height configurations with two arm styles, fixed and height-adjustable, Pli is the culmination of user desires and needs, organizational values, and contemporary design aesthetics.

Research has shown that movement is key to wellness. When preference or ability may prevent standing or other alternative working postures, traditionally rigid seat and backrest designs inhibit wellbeing by limiting range of motion. Pli's intuitively designed seat and backrest provide not only immediate physical ease, but lasting support throughout the day without needing to be manually fine-tuned. Pli's four-point seat suspension is complemented by front-edge seat flex through a waterfall design, an engineered-to-flex backrest, and a light scale control mechanism to provide ergonomic support and address diverse user activity with superlative convenience. Pli's "less-is-more" sensibility allows the task chair to adjust to each unique user as they sit, move, reach, and work, smartly redefining seated flexibility.

Allsteel's introduction of Pli not only provides the market with a solution that's designed to intuitively support its user, but one that has been scaled to support the continued reduction in real

estate and workstation footprints. The chair's clean aesthetic emphasizes its ergonomic performance and exceptional comfort, and the choice of 5 back mesh colors and 4 base/frame colors in nature-inspired neutrals make clear that with Pli, both comfort and elegance come standard.
